**User survey**

Please take the time to answer these survey questions:

How do you connect to the Internet?

What type of computer did you purchase ZoneAlarm to protect?

Is your PC connected to other computers by a network?  
 Choose one:

Do you use antivirus software?

All your information is kept confidential. Zone Labs does not sell, trade or exchange your survey information with any organization.

**Configuration Wizard**

**Join DefenseNet to Help Fight Hackers**

**DEFENSENET IS A COMMUNITY OF USERS UNITED AGAINST HACKERS.**

DefenseNet is a community of ZoneAlarm users like you who anonymously share their program policies with us. Armed with this data, our experts can quickly deploy policy to protect the ZoneAlarm community from the latest spyware and attacks.

In force for over a year, DefenseNet has already protected ZoneAlarm users from significant Internet attacks.

**Do you want to participate in the DefenseNet community protection network?**

**Yes, automatically and anonymously share my settings. (recommended)**

I want to help the ZoneAlarm community fight spyware and hackers.

**No, thanks.**

**Note:**

For more information about DefenseNet or about opting out of this program in the future, [click here](#).

**Configuration Wizard**

**Turn on SmartDefense Advisor**

**SMARTDEFENSE ADVISOR HELPS YOU MAKE SECURITY DECISIONS.**

SmartDefense Advisor automatically updates you with the latest program security settings to fight spyware and other dangerous threats, making the ZoneAlarm Pro safe and easy to use.

These settings are created by Zone Labs security experts who analyze data from the DefenseNet community and other sources to discover breaking Internet attacks.

**Which SmartDefense Advisor setting would you like?**

**Automatic (recommended)**

Configure program settings automatically whenever SmartDefense Advisor has a recommended program setting.

**Manual\***

Advise me of SmartDefense Advisor recommendations, but let me make the final decision on program settings.

**Off**

Leave SmartDefense Advisor off.

**ZONEALARM PRO IS READY TO PROTECT YOU**

Your product is ready to protect you.

**What happens next?**

- ✓ You may be asked to restart your computer in order to apply your security settings.
- ✓ You will have the option to view a product tutorial.

**Notes:**

All settings from this wizard can be changed from within ZoneAlarm Pro.

**Click Done to exit the Wizard.**

◀ Back Done

**Windows Security Alert**

To help protect your computer, Windows Firewall has blocked some features of this program.

**Do you want to keep blocking this program?**

**Name: TrueVector Service**  
Publisher: Zone Labs, LLC

Windows Firewall has blocked this program from accepting connections from the Internet or a network. If you recognize the program or trust the publisher, you can unblock it. [When should I unblock a program?](#)

**ZoneAlarm Pro Installation**

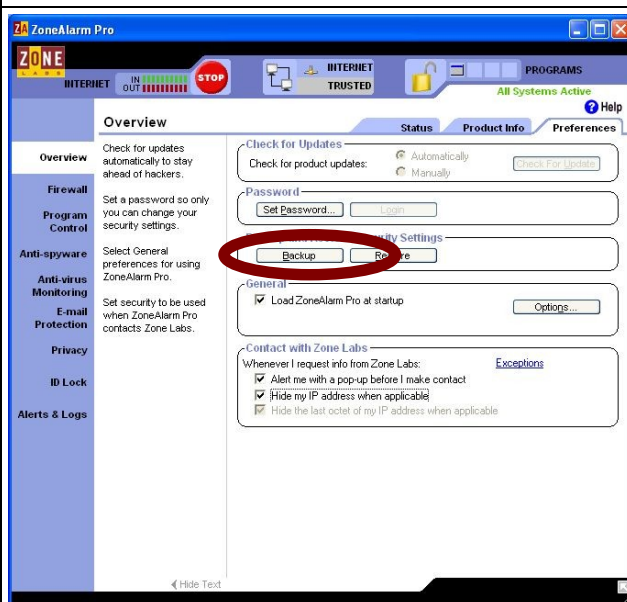

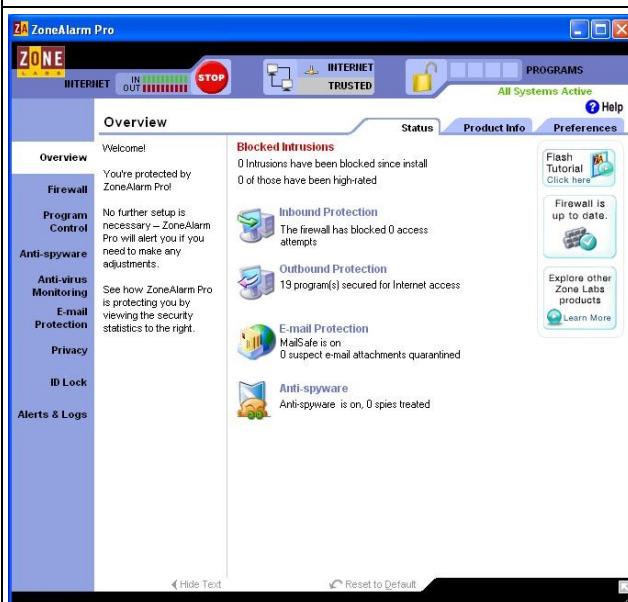

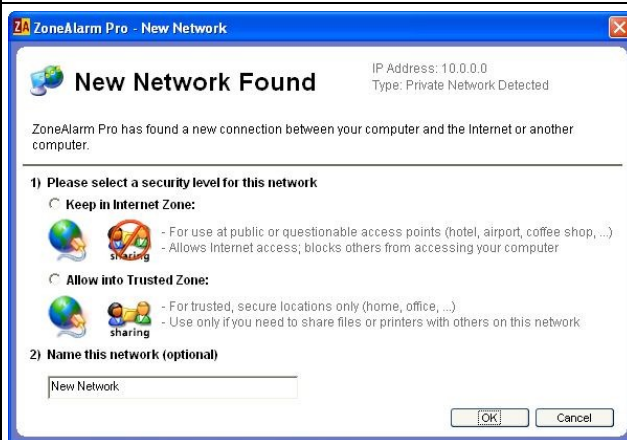

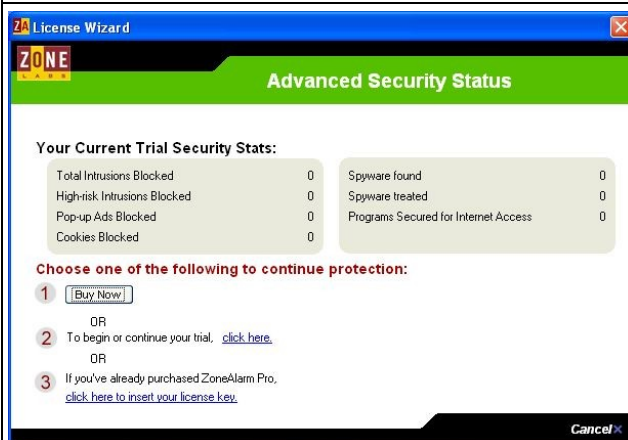

**Restart Your Computer to Finish**

The product will not be fully installed until you restart your computer. Before restarting, be sure to save your work and close any open programs.

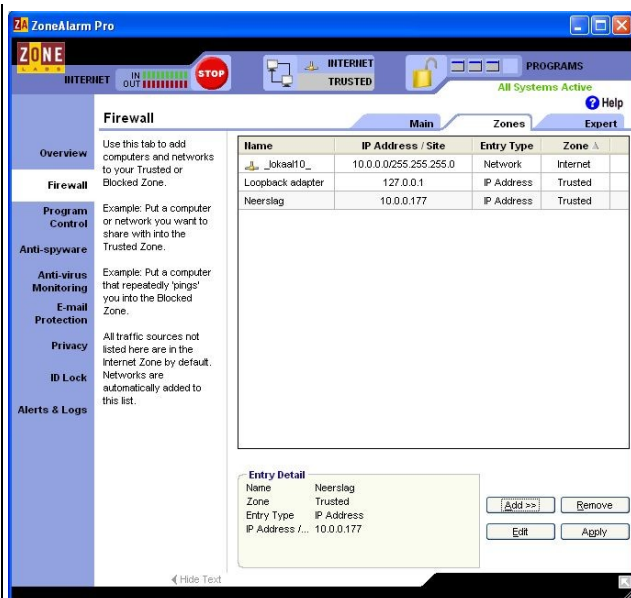

Click OK to restart your computer.

Computer herstarten.

De WindowsFirewall heeft blijkbaar zijn werk gedaan en vraagt wat te doen. Kies voor Unblock!

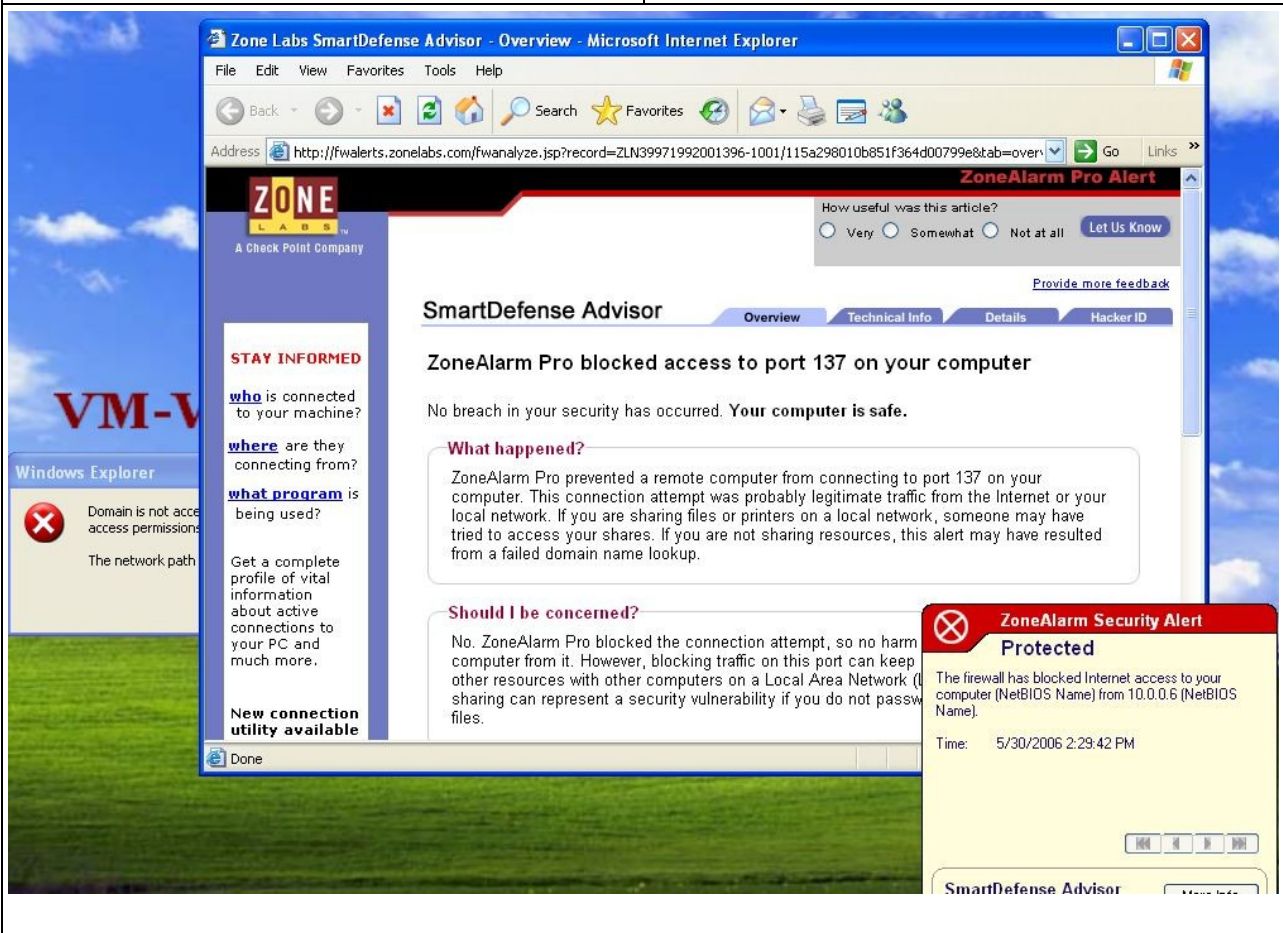

Nadat je alles hebt ingesteld is het verstandig de instellingen te bewaren, zodat je later makkelijk terug kunt naar diezelfde instellingen.

Voor de 'verkeerde' instelling, zie de tekst onder het laatste plaatje.

'Verkeerde' instelling voor lokale netwerk. Losse client-pc in lokale netwerk toegevoegd aan de vertrouwde zone.

If you are sharing files on a local network, password-protect your shared files to keep them secure. See Windows help for instructions on how to do this.

If you are on a home or business local network, and you are receiving repeated alerts on port 137, do the following:

1. Make sure the Internet Lock and Stop buttons are not engaged.
2. Make sure the local computers you want to share files with, or your entire local network, have been added to the Trusted Zone.
3. If the above steps do not reduce the number of alerts, use the Alerts and Logs panel to suppress the alert box.

See ZoneAlarm Pro online help for instructions on how to perform these steps.

Ahh, de computers in mijn lokale netwerk moeten dus aan de vertrouwde zone worden toegewezen!!

## Problemen met programma's

The screenshot shows the ZoneAlarm software interface. The main window is titled "ZoneAlarm" and has a yellow header bar with "ZONE LABS" and "PROGRAMS" buttons. Below the header, there's a status bar with "INTERNET" and "IN OUT" indicators, a "STOP" button, and a lock icon. The main content area is divided into a left sidebar and a main panel. The sidebar has a "Program Control" section with sub-sections: Overview, Firewall, Program Control, Anti-virus Monitoring, E-mail Protection, and Alerts & Logs. The main panel shows a "Program Control" window with a "Main" tab. It contains a table of programs and their access permissions. Below the table is an "Entry Detail" section for the selected program, "Microsoft® Windows® Operating System".

Click here to upgrade to ZoneAlarm Pro.

Het kan voorkomen dat de instellingen voor een programma niet (meer) deugen.

De toegang tot de programma-instellingen krijgt u door aan de linkerkant te kiezen voor "Program Control". Program Control heeft twee tabbladen, *Main* en *Programs*. De tabbladen zitten rechtsboven. Kies voor *Programs*.

Ga in de lijst met programs op zoek naar het programma waarmee moeilijkheden zijn. Klik die aan en lees onder het vak met de programma's de *zgn. Entry Detail* even na of je eerste indruk klopte. Zo ja, dan kun je nu de toegang beter gaan regelen. Dit doe je door op de rij van het gekozen programma in de juiste kolom te klikken

**Program Control**

These are the programs that have tried to access the Internet or local network, along with the permissions they were given.

Change program permissions by left clicking the X, ? and "check" icons.

Access: Allows a program to actively retrieve information on the Internet or network.

Server: Allows a program to passively listen for unsolicited contact from the Internet or network. Very few programs require server rights.

Send Mail: Allows a program to send and receive e-mail.

Entry Detail

Er zijn drie mogelijkheden:

- Allow – Toestaan
- Block – Blokkeren
- Ask – Navragen

Voor bijv. de updates van een virusscanner zou een zinnige instelling zijn om over de eerste drie kolommen toe te staan en alleen de laatste kolom (server) te blokkeren.

Probeer dan eens hoe het met de nieuwe instellingen werkt. U weet nu hoe het aangepast kan worden. In geval van twijfel kan ook altijd nog gekozen worden voor een meer handmatige instelling waarbij u per keer kunt beslissen. Dat is de instelling Navragen, die met het blauwe vraagteken. Experimenteer daar dan mee totdat u weet hoe de definitieve instelling moet zijn.

N.B.: In de Engelst tekst hierboven staat over de categorie (kolom) Server: Een programma wordt toegestaan passief te luisteren naar alle inkomende verbindingen van het internet of netwerk. Er zijn **heel weinig** programma's die serverrechten nodig hebben.
