4.9	Young.....	85
4.10	Java, de Gruyter .....	86
4.11	Lemaître .....	87
4.12	Loubser and Cox .....	87
4.13	The Bulleid Lemaître .....	88
4.14	Summary of the period 1900 to 1940 .....	89
<b>5</b>	<b>The Final Years, 1940 – 1960</b> .....	<b>91</b>
5.1	Chapelon .....	91
5.2	Giesl-Gieslingen .....	91
5.3	S.O. Ell, the British Railways tests.....	94
5.4	Porta .....	99
5.5	National Coal Board .....	100
5.6	Post 1960: Wardale et al. ....	101
5.7	Improved front ends on British heritage locomotives. ....	101
5.8	Post 1960 literature .....	102
5.9	Historical Epilogue .....	102
5.10	The remaining questions.....	104
<b>6</b>	<b>Basic contributing elements</b> .....	<b>107</b>
6.1	The combustion process.....	108
6.2	The ratio of smokegas to steam .....	109
6.3	Boiler resistance.....	110
6.4	The vacuum – smokegas relationship.....	113
6.5	Historical research: The preludes to the jet theory .....	115
6.6	Present day jet theory.....	120
<b>7</b>	<b>Exhaust theory</b> .....	<b>123</b>
7.1	The development of the momentum equation .....	124
7.2	The dimensionless forms of the momentum equation .....	125
7.3	The practical problems, BR Class 5 data.....	125
7.4	Proportions and dimensions, dimensional analysis .....	130
7.5	Analysis of the influence of the dimensionless numbers on performance .....	130
7.6	Flow aspects of front-end components .....	137
7.7	Steps to Improvement .....	145
7.8	The “matching” of the exhaust problem .....	151
7.9	Applications .....	151
